What's New in SARscape® Analytics Toolbox 5.5.3
March 2020

The SARscape Analytics Toolbox – version 5.5.3– introduces some algorithmic improvements and new features.

1   SARscape Analytics Toolbox in ENVI and ArcGIS Pro

1.1   New features

1.1.1   Tools - SAR TS Raster Analyzer

A graphic, showing the extracted value information for a selected pixel, can be created using this new tool. It is particularly suitable for SAR Time Series Tool.

1.1.2   Tools - SAR TS Vector Analyzer

A graphic, showing the extracted value information for a selected point, can be created using this new tool. It is suitable to analyse the Persistent Scatterers results.

1.1.3   Management - SAR Setting AIS CSV format

A new management function to set the column of the csv file in which the parameter is reported can be specified
